

Mega Speed MS90K-A

High Speed Camera

5000 fps @ 1 Mega Pixel Resolution

Frame Rate Summary

4690 fps @ 1280 x 860 – 3.2 sec record buffer
5000 fps @ 1280 x 800 – 3.4 sec record buffer
5600 fps @ 1280 x 720 – 3.4 sec record buffer
8390 fps @ 640 x 480 – 6.4 sec record buffer
10,000 fps @ 1280 x 400 6.4 sec record buffer
16,650 fps @ 640 x 240 – 6.4 sec record buffer
Up to 218,000 fps at reduced resolutions

Specifications

Sensor Type:	CMOS B/W or Colour (Must be one or the other)
Pixel Size:	14µm x 14µm – 4/3 inch sensor format
Sensitivity:	Monochrome ISO 12,000, Colour ISO 6,000
Shutter Speed:	Global Electronic Shutter 1 µS to 1 second in 1 µS steps
Maximum Resolution:	1280 x 850
Internal Memory:	16GB RAM
Spectral Response:	400nm to 800nm
Bit Depth:	10 bits
Lens Mount:	C-mount or F-mount for type D or G lenses
Camera Size:	100x100x150mm Weight: 1600 grams
Power requirements:	3 amps at 11.2–13 volt DC

Optional SATA Internal Solid State Back-Up Drives

IRIG B ready, accuracy greater than 0.1 milliseconds

Pre/Post Trigger Modes

Shock Rating: 100g for 10 milliseconds (Optional)

File Saving: User can save in RAW, AVI, JPEG, BMP or MP4

Playback speeds: User selectable from 1 to 1000 fps for fast video review

PC requirements: Windows XP, 7, 8 or 10, 2GHz, 8GB RAM, 1TB HDD

Gigabit Ethernet: RJ45 input for supplied Cat 6 cable

Camera Software: Provides Camera control, Image analysis, Data acquisition, Object tracking, AVI editing, Note tagging and MP4 compression

Mega Speed MS90K-B is the same camera as above except that it provides reduced resolutions above 4000 fps up to 175,000 fps.
